

# How congestion pricing will benefit Northwest Queens

ASTORIA • CORONA • ELMHURST • JACKSON HEIGHTS • LONG ISLAND CITY • SUNNYSIDE • WOODSIDE

## New York City's transit system is in crisis

**Congestion pricing is a realistic step we can take to reduce traffic, cut air pollution, and increase funding for public transportation.**

- ▶ Congestion pricing would charge drivers entering Manhattan below 60<sup>th</sup> Street at certain times, and use the revenue for citywide transit improvements.
- ▶ In London, congestion pricing has improved transit, reduced traffic congestion by 15%, and reduced greenhouse gas emissions by 20%. In Stockholm, traffic congestion decreased by 22% and childhood asthma rates dropped by 50% after congestion pricing started.

## Improvements are planned — but need funding

**These MTA projects are underway or already completed:**

- ▶ More reliable service on the E, F, M, and R
- ▶ Direct LIRR service into Grand Central when East Side Access is complete
- ▶ Provide new intercoms so customers can speak directly to transit employees for information or emergency assistance
- ▶ Modern and resilient voice and data communications
- ▶ Energy efficient windows at LaGuardia Depot

**Many of these projects are delayed or in need of additional money to proceed:**

- ▶ A new Elmhurst Station on the LIRR's Port Washington Branch
- ▶ Up to 1.5 hours of time savings for Queens express bus riders each week
- ▶ More reliable train service on the G line
- ▶ Over 180 fully accessible (ADA) stations system-wide in 10 years
- ▶ Purchase over 3,000 new subway cars

## Help New Yorkers get where they need to go — Get congestion pricing passed in 2019!
